

UNIVERSE PROFILE: U_n(47, 11) — Discriminant D = 2165

Field: $Q(\sqrt{2165})$ | Tested primes: 3 .. 99991

Field: $\mathbb{Q}(\sqrt{2163})$ | tested primes: 31: 99991

Staircase valuations and Reich bound (single axis, log scale)

Statistical Summary

Total primes tested : 9,591

Standard primes (v=1): 9584

WSS candidates ($v \geq 2$): 4

Exact zeros (periodic primes): 0

Max observed valuation : 5

p-adic depth (max k): 5

Theoretical safety margin
(log10): 12

ANOMALY LOG — primes with $v_p(U_n) \geq 2$

3 $v=5$

409 $v=2$

29 $v=2$

5903 $v=2$

Note: primes tested up to 99991. Reich bound plotted on same axis (log scale).
